

COMPACT YET RUGGEDLY POWERFUL

SD170

SUPER DUTY INDUSTRIAL SWEEPER

Built tough in the USA, the SD170 sweeper combines compact design with super-duty performance for the most rugged industrial workspaces.

Engineered for the most demanding conditions, the SD170 floor sweeper boasts weatherproof steel construction and industrial-grade components, including a durable cast-iron engine block and head to minimize thermal stress. Designed to reduce downtime and consistently manage dirt and debris, the SD170 is powered by a robust Kubota engine known for its world-class reliability, meeting the rigorous demands of industrial use. Available in both LPG and Diesel fuel options

FEATURES

- Promoting high productivity in large areas with efficient coverage of up to 17,168 sq. m per hour.
- Agricultural-grade coated steel promotes durability and longevity in the harshest operating conditions .
- High-performance, dual-panel dust filtration system captures fine particles down to 1 micron with 99% efficiency.
- Tool-free brush changes and swing-out engine access simplify maintenance, saving time and costs.
- Large waste hopper can be raised to 1500mm, for ease of emptying over waste receptacles.
- Flashing lights and working headlights improve visibility and safety in low-light conditions.
- Simplified operation supports use by operators of all experience levels.

SPECIFICATIONS	SD170D	SD170LPG
Sweeping Width	1625mm main broom + side broom	1625mm main broom + side broom
Theoretical Cleaning Capacity	17,168sqm	17,168sqm
Power Supply	24.8 HP Kubota Diesel Engine	55 HP Kubota LPG Engine
Filtration Type	10.2m2 Dual Dust Panel Filtration to 1 Micron	10.2m2 Dual Dust Panel Filtration to 1 Micron
Waste Hopper Capacity	450L	450L
Waste Hopper Empty Height	Variable to 1500mm	Variable to 1500mm
Operational Incline	Up to 16%	Up to 16%
Machine Dimensions	2534 x 1610 x 1409mm	2534 x 1610 x 1409mm
