

CONQUEST HD200

RIDE-ON POWER SWEEPER

SIZE DOES MATTER

HD200 uses a unique 4-wheel drive system, which not only offers a safer ride, but also a more reliable one. Operators enjoy smooth performance free from shocks and bumps.

Boasting a large 600 litre waste hopper and powder coated steel frame, the HD200 clears dust and debris from even the largest and toughest environments. Available in either Gas (LPG) or Diesel (D) configurations, the HD200 floor sweeper will tackle even your most difficult floor cleaning challenge.

HD200

The largest and most powerful ride-on industrial floor sweeper in its class, delivering a thorough clean time after time

Features & Benefits

- The direct throw sweeping system pitches debris directly into the hopper.
- 13m² green polyester filter is water resistant, meaning that the filter will last up to five times longer than filters in most machines.
- Self-levelling, spring loaded brush enables HD200 to clean across multiple surfaces without stopping to manually adjust brushes.
- Electric filter cleaner with simple switch activation to automatically shake the dust out of the filter, into the waste hopper.
- 600L waste hopper with hydraulic dump height of 1550mm allows for longer sweeping periods.
- Hydraulic direct drive with fewer moving parts reduces potential maintenance concerns.
- The only sweeper in the world with a stainless steel waste hopper flap, eliminating flap corrosion.
- Unique four-wheel design allows both rear wheel driving and steering, enabling greater stability, safety and operator comfort.

Technical Specifications

HD200LPG	
Cleaning Width	1680mm sweep path with main broom and one side broom
Theoretical Cleaning Capacity	28,000m ² per hour (max. speed)
Engine	4 cylinder, 56 HP water cooled, VW diesel engine with Cyclone pre-filter and Donaldson air cleaner
Waste Hopper Bin Capacity	600L with hydraulic high dump
Filter Type	13m ² green polyester filter
Variable speed	0-14Km/hr
Machine Dimensions	2450 (L) x 1760 (W) x 1665 (H)mm
Weight	1530kg

HD200D	
Cleaning Width	1680mm sweep path with main broom and one side broom
Theoretical Cleaning Capacity	28,000m ² per hour (max. speed)
Engine	4 cylinder, 36 HP water cooled Kubota diesel engine with Cyclone pre-filter and Donaldson air cleaner
Waste Hopper Bin Capacity	600L with hydraulic high dump
Filter Type	13m ² green polyester filter
Variable speed	0-14Km/hr
Machine Dimensions	2450 (L) x 1760 (W) x 1665 (H)mm
Weight	1530kg
